card + socket need ~109.7 mm across but the cover-screw bosses leave 107.05 mm. Plan: printed frame + S78B (FRAME_PLAN.md).
Open issues (RESEARCH_TODO item 7b): with S55B the card is pinned behind the stiffener, so J3 overruns the rear wall;
MECHANICAL PLACEMENT DRAFT — NOT FOR FAB. Parts right of the board are unplaced (staging).
